Data Engineer (Azure)

@ One**point**

(UK_JD2022-10_UK.001)

Become part of Team Onepoint

Onepoint does more than solving complex digital challenges. It is a place for you to explore your potential, elevate yourself, and transform your career. An opportunity to belong to a diverse international team knit together by a culture built on respect and integrity. A team with deep technical and business expertise, emboldened by a supportive, nurturing environment. An environment that celebrates the diversity of thinking, knowledge sharing, innovative mindsets, personal growth, and career progression. Add in the company's forward-thinking management and a commitment to offering a healthy life-work balance, and you start to get an insight into the magic sauce that makes Onepoint a uniquely special place to work.

A boutique, values-driven, business-oriented technology consultancy, Onepoint's teams architect, prototype, build, and manage enterprise-grade solutions for global clients to help them realise their strategic digital priorities.

About the role

As a Data Engineer (Azure), you will focus on developing new features, implementing unit tests and help develop forward-thinking development strategies. You are passionate about developing software and scripts to maintain complex data-related systems, with vision and talent to contribute to emerging areas such as cloud technologies. Working together with highly skilled technical experts, you will be a driving force in building world-class solutions for our clients across the globe.

Contract type	Permanent, typically working from UK 9 – 5:30 pm and it may vary as per client requirement
Location	Manchester, UK
Salary range	£18K - £35K
Experience	Up to 2 years

What will you work on

- Contribute to designing software components to improve reusability and maintainability.
- Develop backend functionalities with high-quality standards with proper unit tests.
- Build templates and platform extensions to be reused to improve productivity of our team.
- Document accurately the implemented designs and the produced code.
- Anticipate, identify, and solve data related issues.

Who will you work with

You will be reporting to the Technical Lead. You will work with Onepoint Project Leader, client-side Project Manager, and other talented Onepoint teammates.

What you will bring to the team

- A recognised qualification in Computer Science or equivalent experience.
- Experience in Azure (ADF, Logic Apps), Azure Functions.
- Experience with SQL and Databases.
- Experience with languages like NodeJS or Python.
- Knowledge of data warehousing/ data modelling knowledge.
- Knowledge of Snowflake.
- Knowledge of design patterns and Software Development Life Cycle.

What strengths you will bring to the team

- Excellent communication and interpersonal skills to collaborate with various stakeholders.
- Good reasoning and logical ability.
- A learning enthusiast who loves constant learning and enjoys new challenges.
- A proactive Self-Starter with excellent time management skills.
- Data analytical skills to raise the right questions and understand the big picture.

We want to know more about you

So, you know a bit about us now. To get us started, we would love to get a little glimpse into what you are about. Send us your CV and short answers to the four questions below to careers@onepointltd.com.

1. What virtue, do you value the most at work and why?
2. How do you keep up to date with the technology that is constantly changing?
3. How soon will you be available to join if appointed?
4. What is your current and expected salary?

Benefits

We continually empower our employees to take charge of their career & personal well-being. Besides the life-work balance, self-development, and participative decision-making, you also tap into the following array of perks:

- Flexible working .
- 20 days of annual leave.
- Pension fund.
- After successful completion of probation, the employee is eligible for dental care insurance, critical illness cover, life insurance, and private medical care insurance.
