Junior Test Engineer
@ One**point**

(UK_JD2022-10_UK.005)

Become part of Team Onepoint

Onepoint does more than solving complex digital challenges. It is a place for you to explore your potential, elevate yourself, and transform your career. An opportunity to belong to a diverse international team knit together by a culture built on respect and integrity. A team with deep technical and business expertise, emboldened by a supportive, nurturing environment. An environment that celebrates the diversity of thinking, knowledge sharing, innovative mindsets, personal growth, and career progression. Add in the company's forward-thinking management and a commitment to offering a healthy life-work balance, and you start to get an insight into the magic sauce that makes Onepoint a uniquely special place to work.

A boutique, values-driven, business-oriented technology consultancy, Onepoint's teams architect, prototype, build, and manage enterprise-grade solutions for global clients to help them realise their strategic digital priorities.

About the role

As a Junior Test Engineer, you will support the Development and Testing teams in regression testing, quality assurance tasks, fault finding & verifying bug fixes. You are passionate about maintaining quality assurance in all deliverables to support our goodwill. You have a foresight to create a test strategy and test plan. You have an eye for detail, and you don't assume anything. Working together with highly skilled technical experts you will be a driving force in building world-class solutions for our clients across the globe.

Contract type	Permanent, typically working from UK 9 – 5:30 pm and it may vary as per client requirement
Location	Manchester, UK
Salary range	£18K - £35K
Experience	Upto 2 years

What will you work on

- Ensuring software features remain at the highest standards.
- Have an ability to prioritise test scenario delivery and deadlines.
- Developing and executing test plans/cases by performing manual or automated testing.
- Accurately document all testing activities.
- Build testing templates and platform extensions to facilitate reusability.

Who will you work with

You will be reporting to a Technical Lead. You will typically work with a Onepoint Test Lead, a client-side Project Manager, and other talented Onepoint colleagues.

What skills you will bring to the team

- A recognised qualification in Computer Science or equivalent experience.
- Experience in manual testing.
- Experience with SQL language and Databases is essential.
- Knowledge of the Software Testing Life Cycle (STLC) and designing Test Scripts.
- Knowledge of the Java language, data model and ETL architecture.
- Knowledge of SOAP and REST API endpoints and Postman or similar tools.
- Knowledge of performance tools such as JMeter.
- Knowledge of documenting testing results.
- Knowledge of automation testing frameworks.

What strengths you will bring to the team

- Excellent communication and interpersonal skills to collaborate with various stakeholders.
- A learning enthusiast who would quickly pick up new programming languages, technologies, and frameworks.
- A proactive Self-Starter with excellent time management skills.
- Problem-solving and analytical skills across technical, product, and business questions.
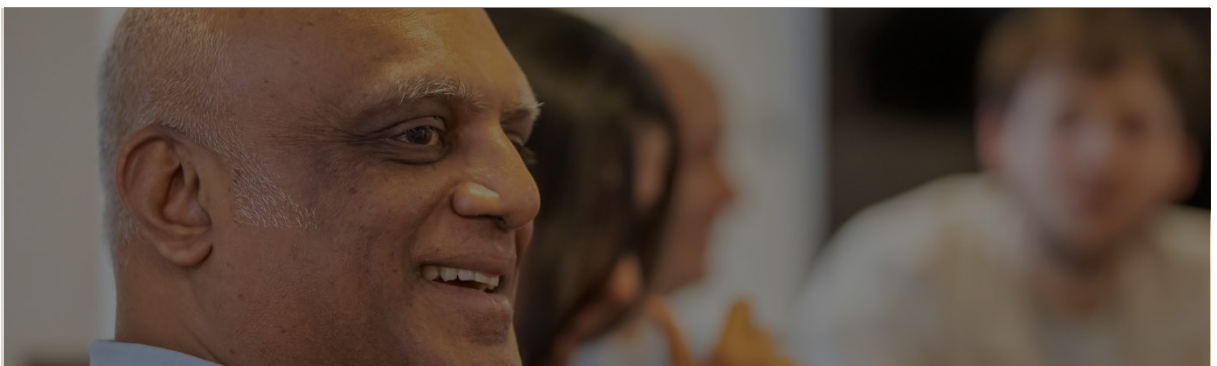

We want to know more about you

So, you know a bit about us now. To get us started, we would love to get a little glimpse into what you are about. Send us your CV and short answers to the four questions below to careers@onepointltd.com.

1. What virtue, do you value the most at work and why?
2. How do you keep up to date with the technology that is constantly changing?
3. How soon will you be available to join if appointed?
4. What is your current and expected salary?

Benefits

We continually empower our employees to take charge of their career & personal well-being. Besides the life-work balance, self-development, and participative decision-making, you also tap into the following array of perks:.

- Flexible working.
- 20 days of annual leave.
- Pension fund.
- After successful completion of probation, the employee is eligible for dental care insurance, critical illness cover, life insurance, and private medical care insurance.
