

# Low-code Developer @One**point**

(CMB\_JD2022-11\_LK.004)

## Become part of Team Onepoint

Onepoint does more than solve complex digital challenges. It is a place for you to explore your potential, elevate yourself, and transform your career. An opportunity to belong to a diverse international team knit together by a culture built on respect and integrity. A team with deep technical and business expertise, emboldened by a supportive, nurturing environment. An environment that celebrates the diversity of thinking, innovative mindsets, knowledge sharing, personal growth, and career progression. Add in the company's forward-thinking management and a commitment to offering a healthy life-work balance, and you start to get an insight into the magic sauce that makes Onepoint a uniquely special place to work.

A boutique, values-driven, business-oriented technology consultancy, Onepoint's teams architect, prototype, build, and manage enterprise-grade solutions for global clients to help them realise their strategic digital priorities.

## About the role

As a Low-code Developer, you will design and develop new features using low-code / no-code platforms, implement unit tests, and help define forward-thinking development strategies. You are passionate about designing and developing efficient code with high standards, with a vision and talent to contribute to areas of emerging technologies. You like logic and solving puzzles. Working together with highly skilled technical experts, you will be a driving force in building world-class solutions for our clients across the globe.

---

Contract type	Permanent, typically working UK hours (08:00 to 17:00 UK). Hours may vary depending on client requirements. Your local working hours in Sri Lanka will adjust based on seasons (to match UK day light savings time).
Location	Colombo, Sri Lanka
Experience	2+ years

---

## What will you work on

- Design software components in a smart way to improve reusability and maintainability using modern (low-code and no-code) and traditional application development platforms.
- Develop backend and frontend functionalities with high-quality standards and proper unit tests.
- Build templates and platform extensions to be reused and improve the productivity of our team.
- Accurately document implemented designs and produced code.

## Who will you work with

You will be reporting to an Engineering Manager. You will typically work with a Onepoint Project Leader and other talented Onepoint teammates.

## What skills you will bring to the team

- A recognised qualification in Computer Science (e.g. a Bachelor's Degree) or equivalent experience (e.g. 2+ years in a similar work role).
- Experience with SQL, JSON, XML, HTML5, CSS3, JS.
- Experience building flows to accomplish backend functionalities.
- Experience in UI / UX development.
- Experience of low-code and no-code platforms. (e.g. PowerApps, Power Automate, Quickbase).
- Experience in automated unit testing and integration testing.
- Experience with design patterns and Software Development Life Cycle (SDLC).
- Knowledge of SOAP and REST API endpoints.
- Knowledge of Cloud platforms and services for AWS, Azure, or GCP.
- Knowledge of scripting languages and wireframe software.

## What strengths you will bring to the team

- Excellent written and verbal communication skills.
- Excellent interpersonal skills to collaborate with various stakeholders.
- A learning enthusiast who would quickly pick up new programming languages, technologies, and frameworks.
- Good analytical skills to raise the right questions and understand the big picture.
- A learning enthusiast who loves constant learning and enjoys new challenges.
- A proactive Self-Starter with excellent time management skills.

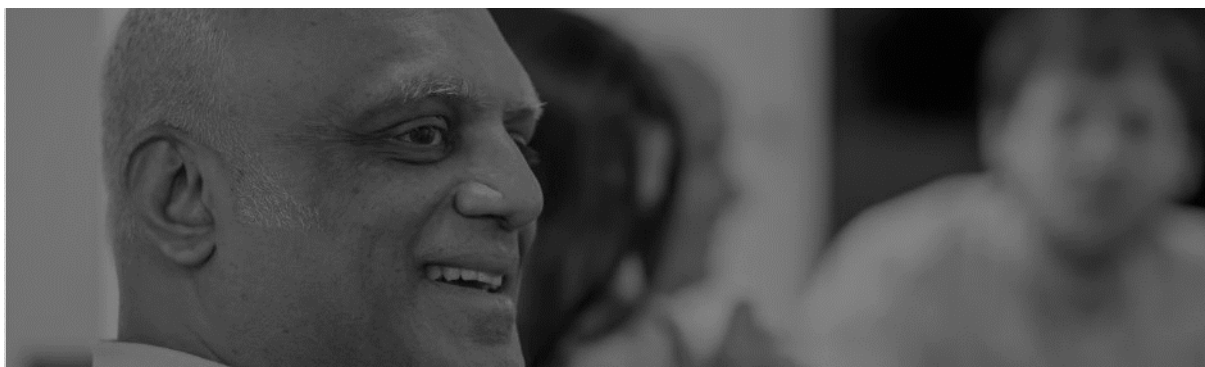

## We want to know more about you

So, you know a bit about us now. To get us started, we would love to get a little glimpse into what you are about. Send us your CV and short answers to the four questions below to [careers-lanka@onepointltd.com](mailto:careers-lanka@onepointltd.com).

1. What virtue do you value the most at work and why?
2. How do you keep up-to-date with technology that is constantly changing?
3. How soon will you be available to join if appointed?
4. What is your current and expected salary?

## A bit about benefits

We continually empower our employees to take charge of their career and personal wellbeing. Besides the life-work balance, self-development, and participative decision-making, you also tap into an industry-leading compensation package, including **your Rupee (LKR) salary pegged to Pounds Sterling (GBP)** to adjust for local currency fluctuations and an **array of thoughtful perks**.
